

SYED OWAIS QUADRI

Software Engineer | Java & Spring Boot | Full-Stack Development | Cloud & DevOps

+91 63629 46800 | oquadri381@gmail.com | linkedin.com/in/syed-owais-quadri | github.com/Syedowais381 | syed-owais.vercel.app | Kalaburagi, Karnataka

PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate (B.E. 2027, CGPA 8.2/10) who designs and ships production software end to end. Built a Docker-sandboxed multi-language code execution engine in **Java 21 / Spring Boot**, a multi-tenant ERP platform spanning six business modules and 38 REST endpoints, and automated **CI/CD deployment to Microsoft Azure** with GitHub Actions. Seeking a software engineering role to apply strong backend, database and cloud fundamentals at enterprise scale.

TECHNICAL SKILLS

Languages	Java, JavaScript, TypeScript, Python, SQL, HTML5, CSS3
Backend	Spring Boot, Spring Data JPA, Hibernate, REST APIs, WebSocket, JDBC, Maven, FastAPI
Frontend	React.js, Next.js (App Router), Redux, Tailwind CSS, Responsive UI Design
Databases	PostgreSQL, MySQL, Supabase, H2 — schema design, migrations, indexing, row-level security
Cloud & DevOps	Microsoft Azure (App Service, Azure SQL), AWS (EC2, S3), Docker, Docker Compose, Git, GitHub Actions (CI/CD), Vercel
AI & Automation	Google Gemini API, Hugging Face Transformers, n8n, Make, Zapier, Apify, GoHighLevel
Fundamentals	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Agile/SDLC, Git; Postman, Swagger/OpenAPI, Linux

PROFESSIONAL EXPERIENCE

Software Developer Intern — Xryte Byte Technologies LLP

Aug 2026 – Present

- Build and maintain **client-facing full-stack web applications** in React/Next.js, backed by REST API endpoints and relational database queries.
- Develop **CRM and workflow automations** — lead capture, pipeline updates and automated multi-channel notifications across third-party platforms.
- Own **production modules handed over from senior developers**, resolving defects and shipping features within an established codebase and Git-based review workflow.

Freelance Software Developer — Independent — Remote

Jan 2026 – Present

- Delivered full-stack web applications and automation systems for real-estate, travel and marketing clients, from requirements through architecture, development and deployment.
- Built a **LinkedIn lead-discovery platform** (Next.js, TypeScript, Supabase/PostgreSQL) with 10 REST endpoints and person-level global deduplication; sourced **~70,000 structured leads**.

PROJECTS

CodePulz — Sandboxed Multi-Language Code Execution Engine

2025

Java 21, Spring Boot 3.5, Docker, WebSocket, REST, OpenAPI, React

- Executes **untrusted user code inside disposable Docker containers**, enforcing 0.5 CPU core / 256 MB cgroup limits and a 60-second timeout to contain runaway and malicious submissions.
- Supports **7 languages** (Java, Python, C, C++, JavaScript, Go, C#) via dedicated container images, isolating every run in a bind-mounted temporary workspace destroyed on completion.
- Streams live program I/O over **WebSocket**; versioned REST API documented with Swagger/OpenAPI.

Rig-Base — Multi-Tenant ERP Platform

Mar 2026 – Present

Next.js, React, TypeScript, PostgreSQL, Supabase, Google Gemini API, Stripe, Razorpay · [rig-base.vercel.app](#)

- Multi-tenant ERP spanning **six business modules** (Finance, HR, Inventory, Supply Chain, CRM, Dashboard) across 54 application routes and **38 REST API handlers**.
- Built **role-based access control** over 23 versioned PostgreSQL migrations, using row-level security policies to guarantee tenant data isolation.
- Integrated **Stripe and Razorpay** with idempotent webhooks, bidirectional GoHighLevel CRM sync and Gemini-powered executive insights.

Global DDoS Attack Tracking & Visualization System

2026

Java 21, Spring Boot, Spring Data JPA, MySQL, Docker Compose, Next.js, Three.js · [Live demo](#)

- Spring Boot** service generating and persisting attack telemetry to MySQL through Spring Data JPA, exposing filtered metrics via REST for trend analysis.
- Next.js dashboard rendering live attack traffic on a **3D WebGL globe**; entire stack containerized with **Docker Compose** using health checks and dependency ordering.

Cloud CI/CD Deployment — Employee Management Service

2026

Java 21, Spring Boot, Spring Data JPA, Thymeleaf, Azure SQL, Maven, GitHub Actions

- Deployed a Spring Boot CRUD application to **Microsoft Azure App Service** through an automated **GitHub Actions CI/CD pipeline** triggered on every push to main.
- Configured **environment-specific Maven profiles** — H2 locally, Azure SQL over JDBC in production — keeping CI builds lightweight.

EDUCATION

Poojya Doddappa Appa (PDA) Engineering College

Kalaburagi, Karnataka

Bachelor of Engineering — Computer Science and Engineering · CGPA: 8.2 / 10

Expected May 2027
