PROFESSIONAL SUMMARY

Computer Science student skilled in backend systems, full-stack development, and cloud deployment. Experienced in building scalable microservices, AI-powered automation systems, and sales backend operations through freelance and academic projects. Looking to apply these skills in a Summer 2026/2027 Software Engineering Internship.

EDUCATION

PDA Engineering College, Kalaburagi, KA

Bachelor of Engineering in Computer Science (Expected May 2027) | GPA: 8.2

TECHNICAL SKILLS

Languages:	Java, JavaScript, TypeScript, SQL
Backend:	Spring Boot, Microservices, Hibernate, REST APIs, JUnit, Mockito, Kafka, RabbitMQ
Frontend:	React.js, Next.js, Redux, HTML5, CSS3
Databases & Infra:	PostgreSQL, MySQL, Redis, Docker, AWS (EC2, S3, RDS), Terraform
Tools:	Git, GitHub Actions (CI/CD)

WORK EXPERIENCE

Freelance Software Developer

Jan – May 2026

- Built AI-powered lead generation chat agents for UK-based real estate and luxury travel agencies, automating client intake and scheduling sales calls.
- Developed an AI-driven YouTube creator discovery scraper for Infoscaler, identifying monetizable audiences and enabling new client acquisition.
- Configured CRMs (Zoho, GoHighLevel) for businesses, streamlining client onboarding, payment tracking, and automated notifications.
- Implemented backend automation systems for agencies, integrating payment workflows and onboarding pipelines to improve operational efficiency.

PROJECTS

Business ERP Microservices Platform

Mar 2026 – Present

- Architected a scalable ERP platform with Spring Boot microservices, decoupling HR, Payroll, and Inventory modules for resilience and independent deployment.

- Integrated RabbitMQ and Kafka for asynchronous event streaming, handling ~1,000 transactions/minute.
- Reduced API latency by 40% using Redis caching, easing PostgreSQL load.
- Built KPI Dashboard with React.js and Recharts for real-time business insights.

CodePulz: Sandboxed Online Compiler

2025

- Built secure code execution engine using Docker and Linux cgroups for isolated, concurrent submissions.
- Designed Spring Boot REST APIs for session management and compiler queues, supporting 100+ concurrent users.
- Implemented JUnit testing and resource governance to prevent timeouts and ensure stability.
